

REINFORCED Flexibility

Reinforced flexible fencing, like Centaur®, is one of the strongest fencing options available. Flexible rail absorbs impact, reducing risk of serious injuries to animals and damage to the fence.

Each rail is embedded with three strands of 12.5 gauge high tensile steel wire, providing superior strength and flexibility.

tensile steel wire

FLEXIBLE and Strong

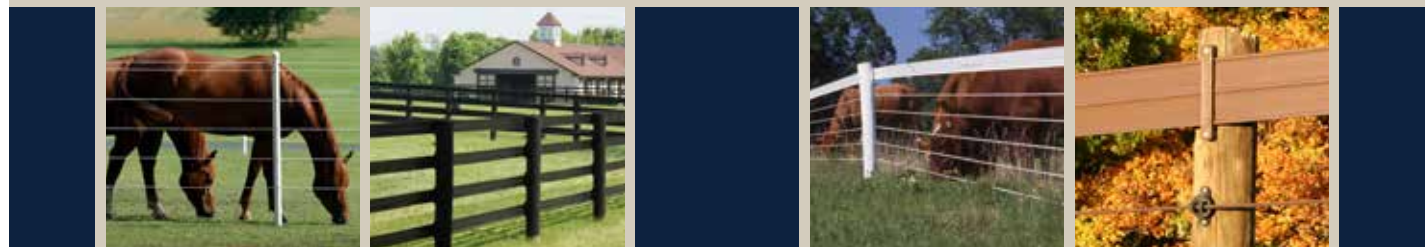

Even an elephant can't stop Centaur's strength and flexibility.

Centaur® rail moves freely through the line post brackets, allowing easy tension adjustment and flexibility.

WHY Choose Centaur®

- Does not splinter, rust, rot or crack
- Customize fence combinations
- Low maintenance
- Withstands extreme temperatures
- Veterinarian approved
- 20 - 30 Year Manufacturer Warranty
- Made in the USA

Visit www.centaurhorsefence.com for featured testimonials.

FAST Installation

Much faster than traditional wood fence installation.

Centaur® fence systems install in continuous lengths. No painting required. Simply unroll, attach and adjust tension. Instruction manuals and on-line videos are available to guide you through the ease of installation.

SUPERIOR Hardware

- Centaur® tensioners are crafted from heavy duty steel and powder coated to help prevent corrosion.
- Installation and adjustments are simple and fast.
- Block and sprocket design tensions with a standard ½" drive socket wrench.

Flexible Rail Systems

- Three 12.5 gauge wires embedded in each rail
- 4,200 lbs of strength per rail
- Withstands temperatures of -40°F (-40°C) to 200°F (93.3°C)
- Electric or Non-Electric
- 20 - 30 Year Manufacturer Warranty
- 330' or 660' rolls of black, brown or white

Coated Wire Systems

- Safety Coated 12.5 gauge wire
- 1,400 lbs of strength per strand
- Withstands temperatures of -40°F (-40°C) to 200°F (93.3°C)
- Electric or Non-Electric
- 20 Year Manufacturer Warranty
- Rolls of 1,320' in black, brown or white
