WIRELESS VEHICLE SENSOR (R4500)

Automatically activates gate operator “Hands-Free” when a vehicle exits the property. Easy installation, minimal trenching required.

Dimensions:
1.75" (4.5 cm) diameter
16.75" (42.5 cm) long.

AVAILABLE FROM:

STANDARD FEATURES

- Electromagnetic sensor detects vehicles in motion.
- Compatible with all automatic gate operators, or other systems requiring a dry contact input device.
- Relay latch time of 2 seconds. May not be used as a safety device.
- Designed for vehicular gate operators – optimized for gate control.
- Easy installation: two piece construction, sensing coil and electronics.
- Long battery life due to low power consumption.
- Easy activation for GTO-Gen3 Control Boards.
- Requires two “AA” Batteries (included).
- Designed to minimize line noise of 50Hz or 60Hz; improves detection capability near power lines and avoids crosstalk frequency issues.

GTO Wireless Vehicle Sensor

Kit includes a wireless sensor wand with a plug-in electronic transmitter module. Transmitter has 15 ft. tether designed for mounting away from driveway edge. GTO’s RB709U-NB two channel receiver and two “AA” batteries are also included. The range between transmitter and receiver is up to 100 ft.
