

EDGE TESTER

Miller Edge Tester, MET-101, allows installers to easily verify the correct operation and termination type for electrically activated Sensing Edges.

MET-101 makes it easy to determine the most common internal wiring and electrical configuration so the correct monitored edge will match up to the operator. It's an ideal tool for all commercial door technicians.

Suggested Uses:

- Determine sensing edge wiring termination type
- Test sensing edge signal output

Benefits:

- Alligator clips on lead wires
- Simplifies wiring identification
- Easy-read LED status indicators
- Auto shut-off saves battery life
- Easily Replaceable Batteries (9V)
- Impact Resistant for Rugged Environments
- Easy test for DC, 10K and Non-Terminated wiring

Model # MET-101
