Marine by Codelocks, locks you can rely on.

The Marine by Codelocks range of mechanical locks feature a specially enhanced, salt spray tested* black marine grade finish to better withstand harsh outdoor environments and coastal applications. They're the same convenient, easy-to-use locks with a tougher exterior.

Following an expansion to the range, it now includes selected locks from the CL200, CL400, CL500 and CL600 mechanical ranges, offering the benefits of key override options as well as lever and ball knob handles. Reliable and durable, these locks are ideal for external applications; outbuildings, construction sites, marinas and homes by the water.

*Up to 1000 hours, tested in-house by Codelocks Ltd.

PINGuard™
by Codelocks

Protect your code. Protect your lock.

PINGuard™ by Codelocks offer flexible, high grade polymer weather shields with additional code protection privacy. Suitable for CL200, CL500 and CL600 mechanicals. Polycarbonate weather shields, included in the kit, are required upon external installation of the CL5200 and CL5500 electronic locks.

Add PINGuard™ by Codelocks to external and internal doors to significantly reduce the effects of water ingress and protect the PINs from view. The added weather protection will extend the life of your lock by protecting the finish, the keypad and overall appearance of your Codelocks product.

Clean
by Codelocks

Clean by Codelocks

An optional coating which can be applied to any of our Codelocks products. The clear, permanent coating combats SARS-CoV-2 coronavirus (COVID-19) and can reduce bacterial growth by 99.96%*, providing an additional measure of protection over sanitization.

Clean by Codelocks features an ISO certified* photocatalytic coating which, when applied to our locks, offers enhanced protection against viruses, bacteria, germs and other environmental toxins. The coating utilizes a process called photocatalytic oxidation, which means that the coating converts harmful bacteria and germs into a non-toxic compound, resulting in a clean and hygienic surface.

Improve your protection against COVID-19 for your staff and visitors by using a Clean by Codelocks lock for your access. During testing*, the coating has shown to be highly effective at eliminating the SARS-CoV-2 coronavirus (COVID-19) within minutes.

Clean by Codelocks should be used in conjunction with existing cleaning and sanitization processes. The coating is resistant to chemical cleaners and will provide enhanced, active protection creating a self-sanitizing surface that helps to reduce build-up of volatile organic compounds (VOCs).

The Clean by Codelocks coating has been evaluated for its resistance against humidity, artificial weathering (through UV exposure) and household chemicals. The coating was applied to Codelocks Smart Locks and, following rigorous testing**, has proven to be:

- ✓ Water resistant in 100% relative humidity
- ✓ Weatherproof against UV Exposure
- ✓ Resistant against household chemicals

KEY FEATURES

- ✓ Tested against SARS-CoV-2 coronavirus (COVID-19)*
- ✓ ISO certified*
- ✓ Clear photocatalytic coating
- ✓ Additional protection over sanitization
- ✓ Reduces bacterial growth by 99.6%*
- ✓ Resistant to chemical cleaners
- ✓ Enhanced protection against viruses & toxins

*Clean by Codelocks is a brand name operated by Codelocks Inc. to describe products that have been treated with the LumaClean™ Multipurpose Photocatalytic Coating manufactured by USA Nanocoat "the Manufacturer". All test results, certifications and claims are those applied for or of the Manufacturer. Clean by Codelocks should be not be considered a replacement for an overall cleaning and disinfection strategy. No claim is made or implied that Clean by Codelocks provides infallible protection against agents that may be harmful in part or whole to humans or animals.
**Independently tested on Codelocks Smart Locks sprayed with LumaClean™ . Testing included 24 hours of being immersed within household chemicals, 1000 hours of humidity and 1000 hours of UV exposure within a laboratory environment.
