MAMMOTH HYDRAULIC
GATE CLOSER (p. 13)

Gate closers

Hydraulic gate closers will transform any gate into a self-closing solution. Comfort, safety and peace of mind are guaranteed thanks to pure hydraulic power. High quality components ensure Locinox gate closers to be 100% weatherproof, maintenance-free and extremely durable. A constant and consistent functioning is guaranteed during an ice cold winter or a sweltering summer. The unique concept ensures an easy and efficient fixation thanks to the patented Quick-Fix system. Moreover, closing speed and final snap can be adjusted very precisely and 100% to your customers' wishes.

CUTTING EDGE SELF-CLOSING TECHNOLOGY

1 CONSISTENCY

If your gate closes too slow, children or pets could sneak through. If your gate closes too fast, it might become a problem for wheelchair users. A loud slamming gate is not only annoying for you and your neighbors, it's also harmful to your gate.

2 COMFORT

The in-house developed high-helix screws guarantee consistent functionality and ensure a comfortable opening speed for elderly or disabled persons.

5 DURABILITY

The powerful torsion spring guarantees the necessary closing force. Your gate will always close, unaffected by strong winds, the width of your gate, or the outside temperature.

3 WEATHERPROOF

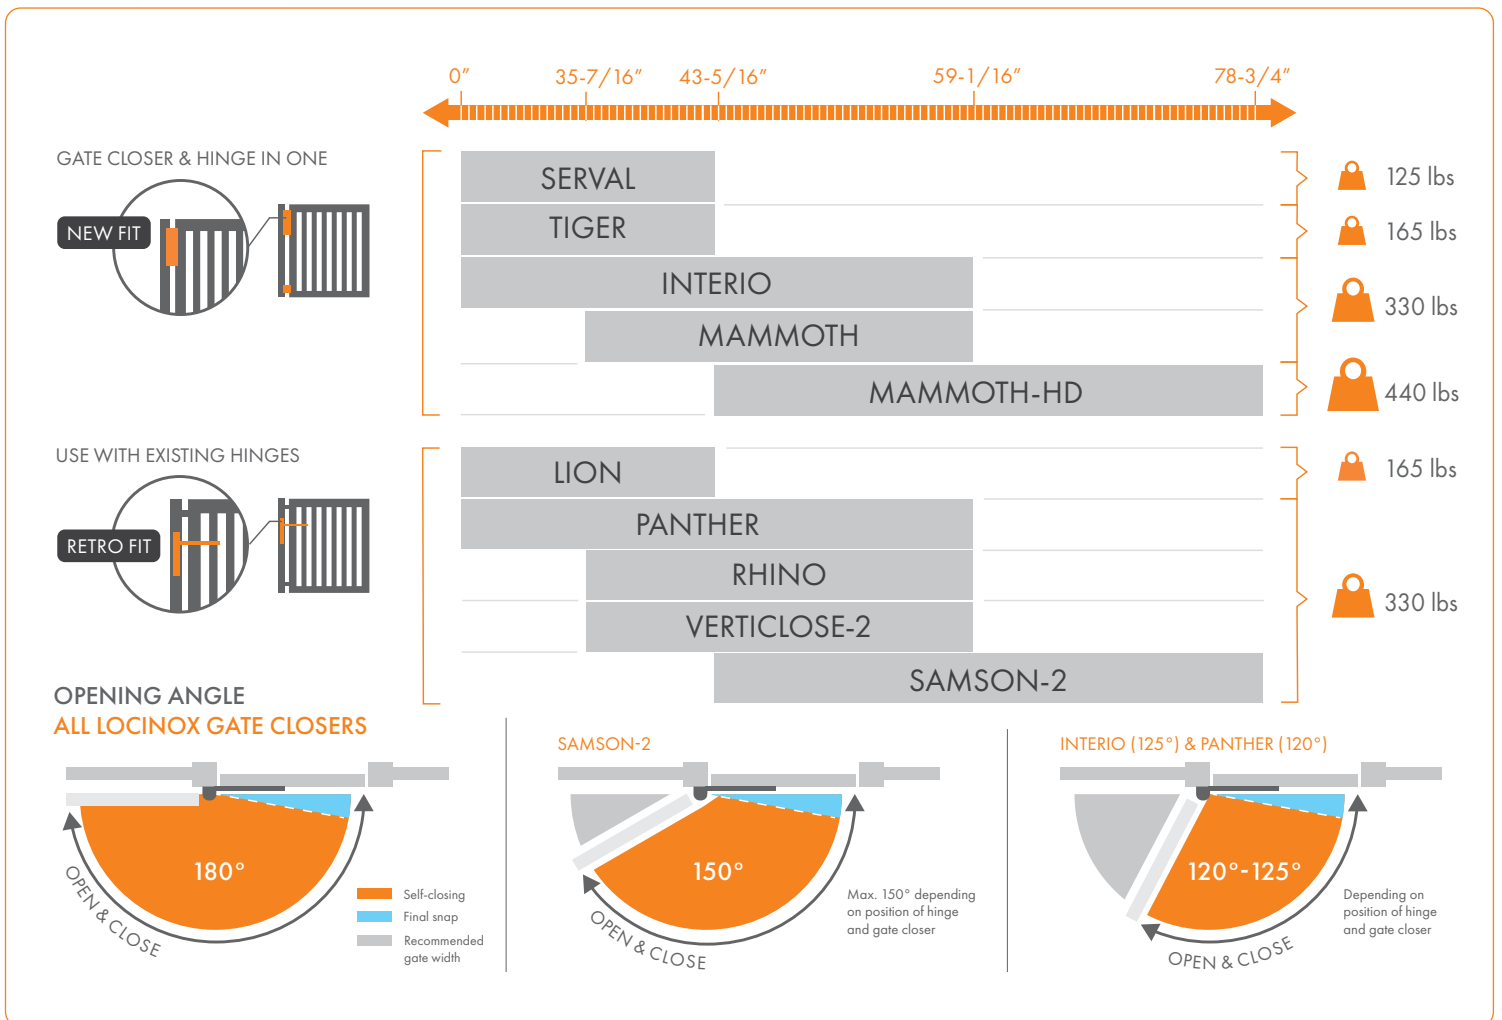

Our gate closers are equipped with rotary seals. These seals protect the gate closers from dirt or dust particles intruding the mechanism, assuring your customers worry-free functioning for many years to come.

4 PRECISION

Some customers prefer their gate to close slowly, while others want it to go a little faster. No problem! All our hydraulic gate closers can easily be adjusted to the wishes of your customers in a matter of seconds.

6 QUALITY

The anodized aluminum housing guarantees full protection against all weather conditions. This housing is frost-free and wind, dust and waterproof, which allows your gate closer to function perfectly.

Hinges & Drop bolts

Hinges support the weight of the gate and ensure it opens and closes smoothly. Because of this heavy task, our hinges are hot-dip galvanized or made of stainless steel. Thanks to our wide range we offer a solution for every situation. Our patented 4D hinge is a top-of-the-line innovation. This hinge is adjustable in 4 dimensions (height/depth/alignment/left or right turning).

Note: The horizontal width of the gate divided by the vertical distance between the hinges installed should be equal or less than 2
