

Smart Community Access

Connected.
Reliable. Secure.

A smarter way to secure and manage your community's access points

Your community is a busy place – residents and guests, daily package deliveries and service repair visits. When you incorporate LiftMaster® Access Control Systems powered by myQ®, you get a scalable smart access management solution that enhances security and reduces liability, while providing residents with a safe, modern living experience they desire.

Always know exactly who is entering and remotely manage community access with a unified solution that provides convenience and peace of mind for you and your residents.

Maximize efficiency and improve operations

Streamline your access management.

myQ® Community is a cloud-based platform that lets you conveniently manage and control multiple access points across all communities in your portfolio from a single dashboard. With 24/7 video monitoring capabilities and real-time activity alerts, you'll know instantly if a suspended code is being used or there is a nuisance at the entrance. Plus, myQ Community has upcoming partnerships with Property Management Systems, including RealPage®. Allowing community managers to save time by connecting to property management software for automatic tenant directory uploads.

Maximize efficiency

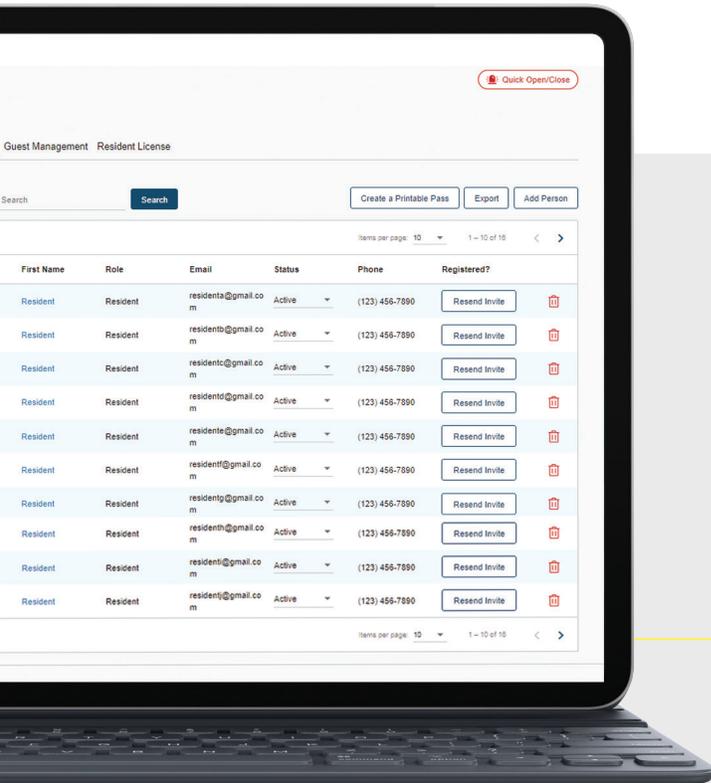

Perform updates from anywhere

Streamline operations

Robust people management

Easily add/delete residents, assign access to specific entrances, set holiday/multiple schedules, monitor guest/event requests and more for improved resident security and traffic flow.

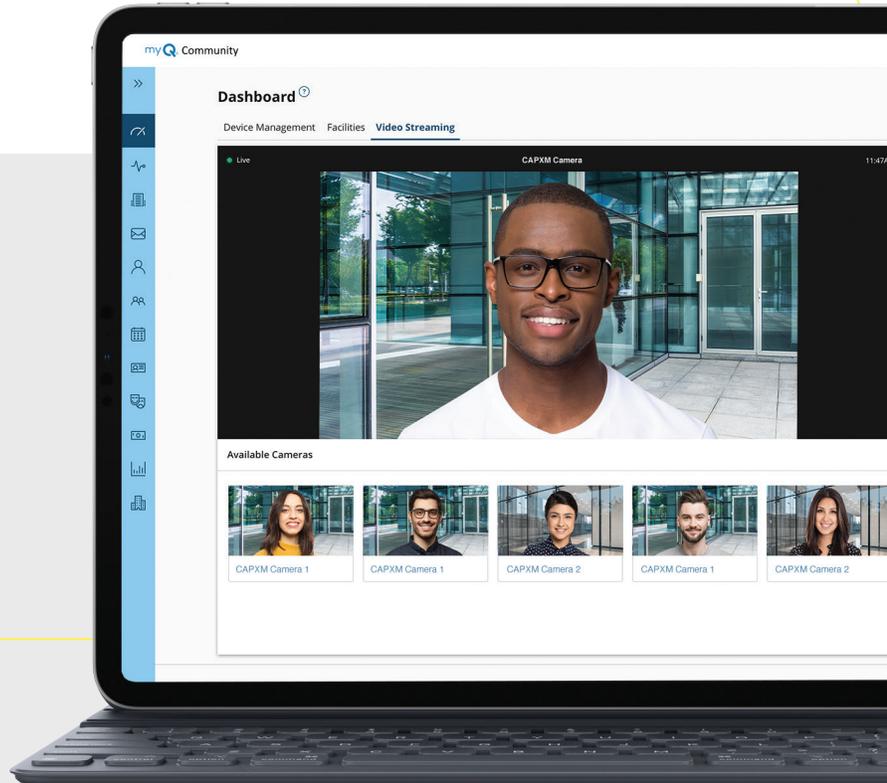

Enhance your security.

Securely oversee how and when residents and visitors can access each entrance across every community you manage with myQ Community. Plus, real-time notifications and remote diagnostics give you the ability to detect and address issues before your residents are even aware.

Video history

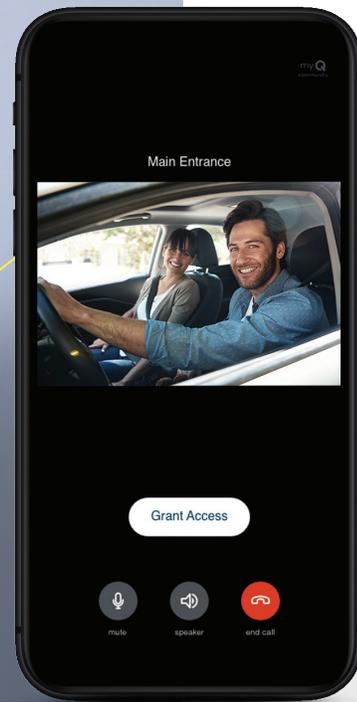

Playback and download stored video clips corresponding to access events.

Access with a view.

Through myQ Community, you can benefit from visual insight over all your Smart Video Intercom-connected access points. Live video streaming and recorded events provide you with clear traceability around property damage, vandalism and other common nuisances.

Make visitor management a standout resident amenity

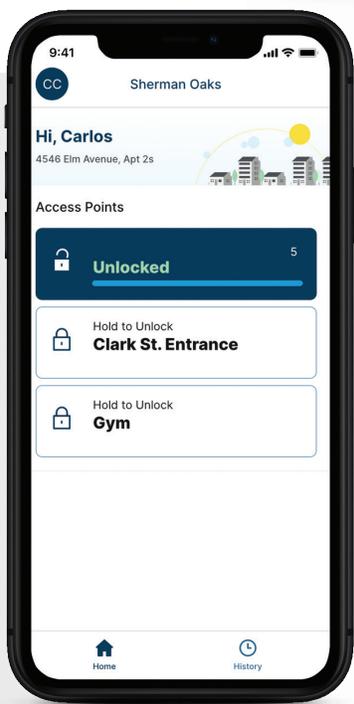

Provide visual confirmation and control with the myQ® Community app.

Give your residents the ability to manage property access from their smartphone. Through the app's one-way video calling and two-way voice communication, residents can safely identify guests and confidently grant/deny access from anywhere.

Seeing is believing

Let residents verify who is at an entrance before granting access.

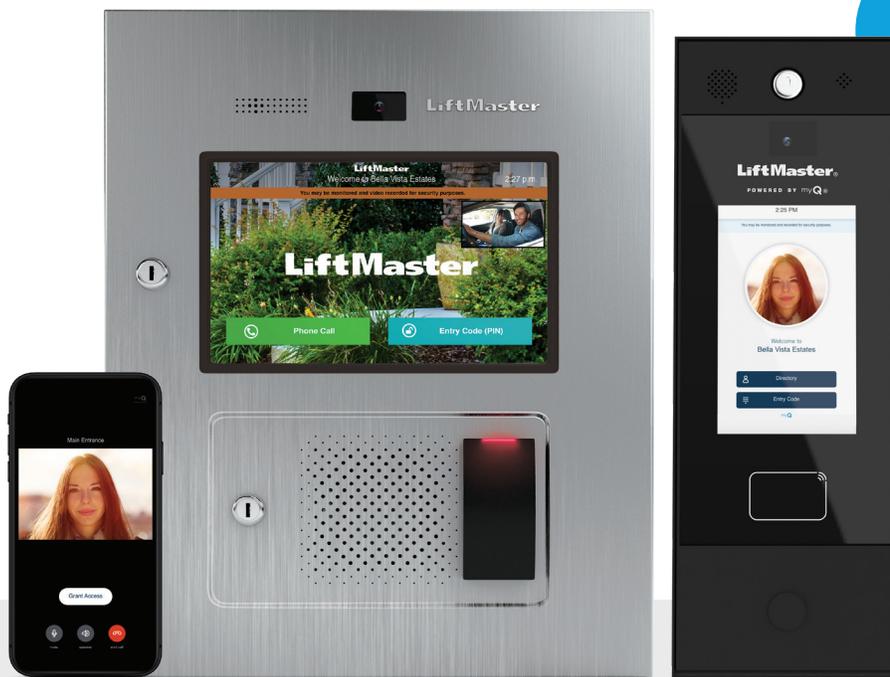

Residents can grant access with the myQ Community app.

Never worry about forgetting your keys. The myQ Community app now has a “press to unlock” feature so that residents can unlock any authorized entrance from their smartphones. Now, it’s easier than ever for residents to let themselves in or open the door for someone else.

Build a standout access experience

LiftMaster®'s powerful combinations of innovative myQ® technology and reliable hardware seamlessly connect community access points for a complete view of multiple entrances across multiple properties. From entry systems to keypads, card readers and event access notifications, our lineup of feature-rich options provides the perfect experience in access control to meet your needs.

Smart Video Intercoms

Make a great first impression with a Smart Video Intercom, a resident facing smart access system. These provide scalable cloud-based solutions to control multiple entry points including vehicular gates and residential buildings.

- ▶ **Integrated Wide-Angle Camera:** Lets you view access points through a live feed or recorded event.
- ▶ **Cloud-based security:** Keeps data protected and safeguards residents' information.
- ▶ **Intuitive high-definition display:** Straightforward experience for community needs.
- ▶ **Robust diagnostic capabilities:** Provides ability to detect and address issues before your residents are even aware.
- ▶ **myQ Community app:** Gives residents the convenience of managing property access from their smartphones.

CAPXLV*

Smart Video Intercom - L

- ▶ 10", 720p high-definition, fade and glare-resistant touchscreen display with picture-in-picture
- ▶ Control up to 4 gates and/or doors from a single system

CAPXM*

Smart Video Intercom - M

- ▶ 7", 720p high-definition, fade and glare-resistant touchscreen display with picture-in-picture
- ▶ Control up to 2 gates and/or doors from a single system

Subscriptions and storage

myQ Community Subscription

myQ Community is a powerful property management platform that lets you remotely manage access points with live-streaming video, real-time notifications and remote diagnostics.

Additional Video Storage

Increase your video storage capabilities to 30 days so you can easily playback and download stored video clips for clear traceability around property damage, vandalism and other nuisances.

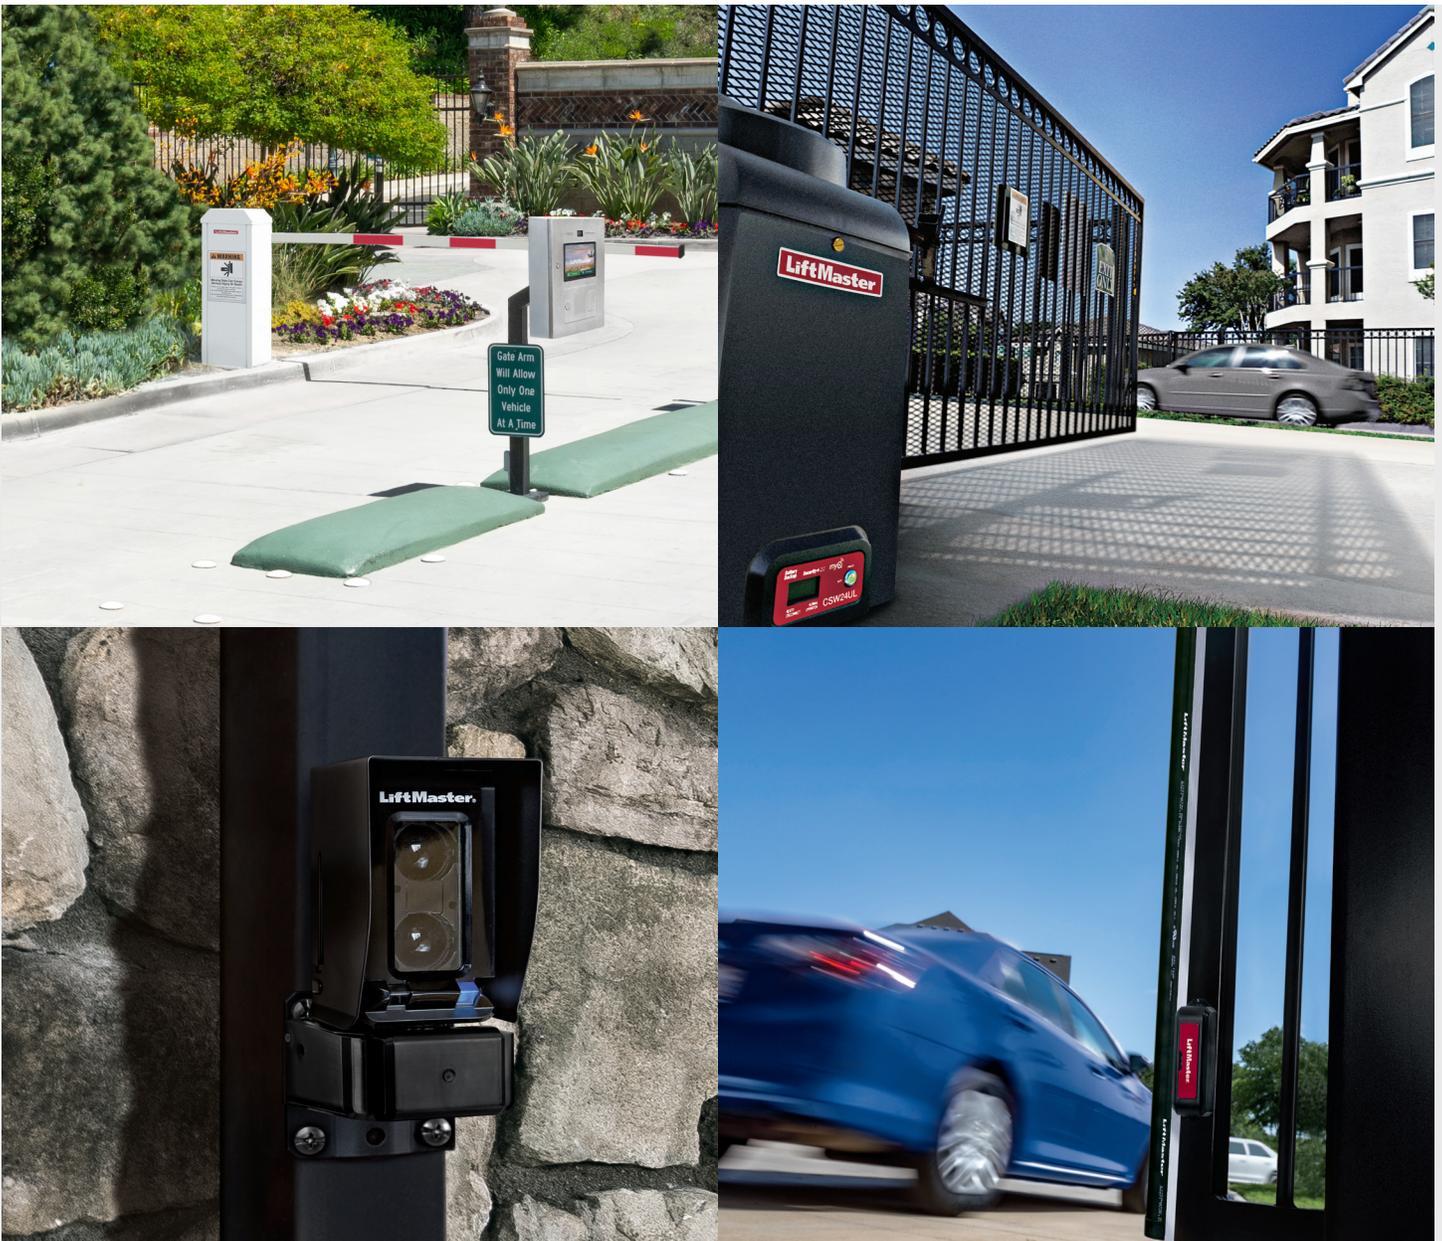

Resident App Licenses

The myQ Community app modernizes the overall resident experience. This app will allow residents to visually identify guests before granting / denying access. Plus the new feature enables residents to "press to unlock" from their smartphone to open authorized access points from anywhere. Increase the number of licenses purchased to fit your community's needs.

* All LiftMaster Smart Access Solutions (including CAPXLV, CAPXM, CAP2D, and CAPAC) require monthly subscriptions to a myQ Community plan. Contact your Dealer or LiftMaster Representative to tailor a subscription plan to fit your community's needs.

Make access safety a priority for your community

Committed to the highest standards of product safety, LiftMaster® garage door and gate operators maintain one of the best safety records in the industry. Select from LiftMaster's full line of gate operators, safety accessories and garage door openers, for customizable solutions compatible with our Smart Video Intercoms and designed to meet any type of access need.

CAP2D*
Smart Access
2-Door Controller

A behind the scenes powerhouse, the CAP2D provides a scalable cloud-based solution to easily manage and control access for resident only and community amenity access points.

CAPXLCAM
Video Camera Kit for CAPXL

Communities that currently have CAPXL systems can easily add all of the video functionality of the CAPXLV with this USB kit.

LMSC1000
RFID Long Range Reader

When paired with LiftMaster hang and vehicle tags, this proprietary system operates seamlessly with the Smart Video Intercoms and Smart Controllers to keep traffic moving in your community.

KPR2000
Wired Keypad and Proximity Reader

Ideal for secondary access points like gym and pool entrances.

HDSW24UL / CSW24UL
HDL24UL / CSL24UL
Swing and Slide Gate Operators

Continuously move gates, providing automated entry for all types of communities and high-traffic applications. Pair with a Smart Video Intercom for remote system diagnostics.

HCTDCUL
Specialty Overhead Operator

The high traffic operator of choice for parking garages in multifamily residential applications; ultra-quiet smooth operation is engineered to reduce wear and tear on the operator, helping to extend the life of the system and increase uptime.

85503
Secure View™ Garage Opener

The most feature-rich LiftMaster residential garage door opener to date. Includes integrated video camera providing a live feed and recorded events. Also includes smartphone control and battery backup. Separate app required.

Passport Remote Controls
Visor and Keychain Remotes with Unique Credentialed IDs

Offer residents a traceable single solution to access gate, garage and other community entry points.

CAPAC*
Smart Access Hub

Get more out of your existing gates and telephone entry systems by providing the ability to monitor and control your access points from anywhere, while also providing residents control through myQ Community app.

LMRRUL
Monitored Retro-Reflective Photo Eye

Provides long-range sensing distance up to 50 ft.; requires power only on one side of the installation; meets UL 325 safety standards.

S505AL
5 ft. Small Profile Resistive Edge

Installation is fast and easy; mounts vertically or horizontally; meets UL 325 safety standards. Compatible with Wireless Edge Kit and Transmitter.

LMWEKITU
LMWETXU
Monitored Wireless Transmitter and Edge Kit

Provides sensing distance up to 130 ft.; two year battery life; Protects up to 8 entrapment points; receiver accepts up to 4 transmitters; meets UL 325 safety standards.

* All LiftMaster Smart Access Solutions (including CAPXLV, CAPXM, CAP2D, and CAPAC) require monthly subscriptions to a myQ Community plan. Contact your Dealer or LiftMaster Representative to tailor a subscription plan to fit your community's needs.

myQ® has a smart access solution for any size or type of community.
