Please read the instruction manual carefully to obtain the best results from your purchase.

Tools that are needed but not supplied with the solar post lamps are: a screw driver.

Solar Lamp Post Location

For optimum light duration throughout the night, it is very important to place your solar lamp in a spot where it will receive the maximum amount of direct sunlight throughout the day.

NOTE: For added solar lamp post stability, place rocks in bottom of the planter.

NOTE: For best results, the solar lamp post must be charged for two sunny days in the "OFF" position,

Operation Instructions

1. Remove part (A) from part (B) by unscrewing the 2 screw caps. Turn the operation switch (Fig. 1) to High (||) for maximum brightness or Low (|) for longer duration (usually used in winter time or in places where there is less sun exposure). The Solar Lamp will automatically operate dusk to dawn.
2. Reattach part (A) to part (B) and secure with the 2 screw caps.

Installation Instructions

1. Place part (I) inside planter, part (J)
2. Insert part (H) through the center circle of part (I) and screw into the bottom of the planter. (Please note, part (H) has its bottom part painted).
3. Screw part (D₁) onto part (H) then screw part (G) into part (D₁).
4. Screw part (D₂) onto part (G) then screw part (F) into part (D₂).
5. Screw part (D₃) onto part (F) then screw part (E) into part (D₃).Screw part (D₄) onto part (E) then screw parts (A+B) into part (D₄).Screw parts (C) x 2 into part (B).

Replacing the Batteries

(After several years of use, the battery may need replacing).

1. Unscrew the two screw caps and detach part (A) from part (B). Make sure the ON/OFF switch is in the OFF(O) position.
2. Unscrew the battery compartment (Fig. 1) screw located on the silver reflector and remove the compartment door.
3. Unclip the connector and remove the old battery. Make sure the new battery is high quality 3.2V/1,500mAh () Li-ion Rechargeable battery with connector.
4. Clip on new battery and install into the battery compartment. Screw back battery compartment screw.
5. Reattach part (A) to part (B) and secure with the 2 screw caps.

WARNING: Do not dispose of Li-Ion battery in the regular trash, municipal waste stream or by fire as batteries may leak or explode. Do not open, short circuit, or mutilate batteries as injury may occur. Preserve our environment by recycling Li-Ion batteries or disposing of them in accordance with local, State and federal regulations. Do not mix old and new batteries.

Maintenance

Clean the solar panels regularly with a damp towel to guarantee optimum performance. Do not use any type of solvent for cleaning and be careful not to put too much pressure on the solar panels while cleaning.

Trouble Shooting

If your solar charged light does not come on at dusk despite observance of all the instructions, please try the following steps:

1. Make sure that the solar lamp is not being affected by any other light source.
2. Ensure the solar lamp is not positioned in the shade during the day.
3. Make sure the switch on the lamp head is in either the Low or High position.
4. Check that the batteries are installed correctly.

NOTE: The performance of the solar lamp will vary with the time of year. It will deliver more light when it has had a full day in the sun rather than a day in overcast weather.

WINTERTIME TIPS: For optimal performance, be sure to remove any snow or debris accumulation from solar panel(s). A solar panel free of debris will charge the batteries much more efficiently.

WARNING: Please keep out of reach of children.
