American Access Systems, Inc. is pleased to offer high quality **Printers** from *Citizen* and *OMNIPrint* to enhance our product line. Each printer we sell is an RS-232 serial port printer, with a limited one year warranty.

AAS model # 21-045 is a portable hand held **Printer** with an internal NiCad battery. This unit can be charged in the office, and then taken out to the outside unit to download the transaction buffer. This allows a true "stand alone" capability on all keypads and card readers.

AAS model # 21-047 is a desktop printer that plugs directly into a normal electrical outlet. This printer will wire directly to any AAS desk top unit, providing a real time list of all transactions. Every desk top **Printer** unit also comes with provisions for hanging the printer on the wall.
