

Clip and Gun FAQs

- What is the spacing that they Connect Clip provides between deck boards?
 - 3/16"
- Can you modify that gapping?
 - No, a 3/16" gap is recommended for proper airflow between deck boards.
- How fast is the installation gun?
 - 3 times faster than hand screwing
 - 2 times faster than a collated gun
 - Installs 400 SqFt of Clubhouse decking in an hour
- What is the cost per square foot for the Connect Clip
 - About a \$1.00 a Square Foot (a price competitive option)
- How many clips will I need for a 300 SqFt deck?
 - Multiply your SqFt by 1.75
 - $300 * 1.75 = 525$
 - A 300 SqFt box has 530 clips inside.
- Can I use connect clips for coastal applications?
 - The 50 SqFt bags have stainless steel screws and clips in them and are coastal approval
 - The scrails inside the 300 SqFt boxes are not stainless and are not coastal approved
- How do you remove a decking board in the middle of the deck?
 - See page 2 for details

Removing a deck board

- Make two cuts in the deck board with a skill saw
- Remove the center of the decking and pull out the left over pieces.
- Back out the screws in the exposed clips.
- Relay your decking by engaging the groove into the remaining clip tabs.
- Cortex the board, 2 screws for every joist.
